prabhu1294.github.io/portfolio/

(Portfolio contains project walkthroughs, architecture diagrams, and multimedia solution presentations)

CORE SKILLS

AI & Automation

- AI-assisted development (Vibe Coding)
- AI Solution prototyping
- AI Document Processing
- OCR & Entity Extraction
- Process Automation

Leadership & Delivery

- Project Management
- Technical Architecture Design
- Stakeholder Management
- Agile Delivery
- Technical Documentation
- Cross-team coordination

Solution Communication

- Technical Solutioning
- Architecture presentations
- Product walkthrough videos
- Multimedia solution demonstrations
- Executive-level technology presentations

EDUCATION

B.Tech - Information Technology

Sri Ramakrishna Engineering | CBE, TN

GPA: 7.4 / 10.0

PROFILE

Technology professional with **9+ years of experience in banking technology**, specializing in **trade finance, payments, enterprise workflow automation, and AI-driven solution development.**

Currently working as a **Technology Manager at Mashreq Bank**, leading digital transformation initiatives while building **AI-powered proof-of-concept solutions using AI-assisted development (vibe coding)** to accelerate automation and innovation.

Experienced in **microservices architecture, Azure DevOps delivery pipelines, and AI-enabled automation platforms**, with strong ability to communicate complex solutions through **architecture presentations and multimedia product walkthroughs for senior leadership.**

WORK EXPERIENCE

MASHREQ

Manager, Technology | 2024 - PRESENT

Assistant Manager, Technology | 2021 - 2024

- Leading technology initiatives across trade finance and payment platforms, focusing on automation, AI-driven solutions, and modern microservices architecture.
- Driving the Trade Settlement Automation initiative, streamlining settlement workflows across trade operations and improving transaction processing efficiency.
- Designing and building AI-powered proof-of-concept solutions using AI-assisted development (vibe coding) to rapidly prototype automation and document intelligence capabilities before production development by engineering teams.
- Collaborating with developers to transition AI-generated POC solutions into production-ready implementations, accelerating innovation cycles.
- Managing project delivery using Azure Boards for backlog management, sprint planning, and Agile project tracking.
- Supporting development teams building microservices-based banking applications using Java Spring Boot (backend) and React JS (frontend).
- Overseeing development pipelines and deployments using Azure DevOps CI/CD, ensuring streamlined build and release processes.
- Coordinating across business, operations, and technology teams, ensuring successful delivery of complex banking technology initiatives.
- Driving workflow optimization and automation initiatives to improve operational efficiency and reduce manual processing.
- Mentoring engineering teams while ensuring alignment between solution architecture, business objectives, and implementation delivery.

NEWGEN SOFTWARE TECHNOLOGIES LIMITED

Team Leader | 2020 - 2021

Senior Software Developer | 2018 - 2020

Software Developer | 2016 - 2018

- Led engineering teams delivering enterprise workflow automation solutions for banking clients, focusing on process digitization and operational efficiency improvements.
- Managed and mentored development teams responsible for implementing enterprise workflow automation solutions using BPM platforms such as Omniflow and IBPS.

CORE AI PROJECTS

Taswiya :

Trade Settlement Automation

- Full STP Process
- Export & Import products
- Processing Speed : 1 Min
- 10,000 Hours saved annually
- Configurable STP
- Development in Six Weeks (Vibe Coding)
- Taswiya Copilot Agent

ATLAS :

Automatic Work allocation

- AI-Agents
- Open AI Model
- Intuitive Dashboards
- AI based Allocation
- Atlas Copilot Agent

TECH STACK

- Backend: Java, Spring Boot
- Frontend: React JS
- Architecture: Microservices
- DevOps: Azure DevOps, CI/CD
- AI: OpenAI Models, AI Agents
- Project Management: Azure Boards

- Collaborated with business stakeholders to identify automation opportunities and design optimized workflow processes for banking operations.
- Coordinated development activities including requirement analysis, solution design, development planning, and system implementation.
- Supported delivery of enterprise banking solutions involving document management, workflow automation, and process digitization.
- Worked closely with project managers and stakeholders to ensure successful project delivery within defined timelines and quality standards.
- Contributed to improving team productivity, code quality, and technical problem-solving capabilities through mentoring and knowledge sharing.
- Developed enterprise banking solutions focused on workflow automation, payment processing, and operational efficiency improvements.
- Implemented automated fund transfer workflows to digitize inward and outward banking processes within enterprise workflow applications.
- Developed workflow rules and business process models using Process Modeler to automate banking operations.
- Implemented QR-code-based payment automation, enabling digital capture and processing of payment-related application forms.
- Built SQL-based reporting solutions to generate operational and analytical reports for business teams.
- Worked across the entire software development lifecycle (SDLC) including requirement analysis, development, testing, deployment, and support.
- Supported system upgrade and migration initiatives, including migration from Omniflow to IBPS enterprise workflow platforms.
- Built enterprise applications supporting banking workflow automation and business process digitization.
- Participated in end-to-end system development lifecycle, from requirement gathering to production deployment.
- Developed and enhanced enterprise workflow applications using Java-based technologies and BPM platforms.
- Improved existing applications by refactoring legacy code and implementing modular development practices.
- Collaborated with cross-functional teams to translate business requirements into scalable technical solutions.
- Provided technical troubleshooting and application support to ensure stable system performance.

SOLUTION COMMUNICATION & MULTIMEDIA PRESENTATIONS

- Developed professional multimedia presentations and video walkthroughs to effectively communicate complex technology solutions and product capabilities to stakeholders.
- Produced solution demonstration videos explaining AI-powered platforms, automation solutions, and enterprise workflows.
- Created high-level architecture diagrams and technical flow presentations illustrating system design, integration points, and microservice architectures.
- Delivered executive-level presentations showcasing product features, automation capabilities, and operational benefits for senior management.
- Designed visual storytelling formats combining architecture diagrams, animations, and narrative explanations to simplify complex banking technology solutions.
- Published project walkthroughs, videos, and architecture explanations in a Git-based portfolio for reference and technical documentation.
